

Say "NO" To Privatization

The University Of Connecticut Health Center is Connecticut's ONLY public hospital and is its flagship teaching institution.

It's unwise to privatize. Short-sighted efforts to privatize patient care in the past have led to the loss of valued departments such as Anesthesiology and the NICU.

Privatizing patient care undermines our ability to provide quality care to otherwise underserved patients.

We need to protect Connecticut's only public academic hospital.
