

# **FUTURE PROBLEM SOLVING IN A PANDEMIC WORLD**

## How to bring this enrichment program to your school!

At a time when several after school programs have been cancelled or postponed, Future Problem Solvers of CT is a way for you to offer rigor and critical thinking skills to your students as a weekly enrichment opportunity. It is a competitive program that lends itself to the virtual environment and offers so much to students by way of communication, collaboration, research, solving real world problems, and creativity.

Join us to learn more about this program as we give examples using our topics for this year: Youth in Competitive Sports, Wearable Technology, Human Environmental Impact, and Personalized Medicine. We will talk about how the program works, different ways to participate, and what you will need to get started.

**TUESDAY FEBRUARY 9, 2021 5PM**

**PRESENTERS:** LAURA HIPP & TOM MARAK

## **Virtual Workshop via Zoom\***
