

Danbury Hospital Technical Professionals Standing Together

Mission Statement

As Technical and Clinical Professionals at Danbury Hospital, we work hard to make our hospital the best it can be. For decades we have worked alongside colleagues who have a union and a contract and are able to have their voices heard when they have a problem. We have seen that as time marches on, decisions are increasingly made in corporate offices far from the hospital floors. We know that without a unified voice we cannot hope to have our input heard when important decisions are being made. For far too long changes at the hospital have been negotiated with our peers and forced on us.

We deserve to be recognized for our skills, rewarded for our loyalty, and respected for the important contributions we make toward the success of our hospital. We demand to be treated with dignity and respect in an atmosphere based on fairness and equality.

To have a voice in our workplace, to ensure the highest quality of patient care, and to bring equity and respect to all the technical employees at Danbury Hospital, we are joining together to form our union. We believe that by coming together we can better advocate for our patients, our community, our families, and ourselves.

It is our sincere hope that we can navigate this process with professionalism and that our decision to organize will be respected.

Sincerely,
The Organizing Committee
