USING AI TOOLS TO SUPPORT TEACHERS & STUDENT ENGAGEMENT

WEBINAR

**MONDAY
JULY 21, 2025**

5PM – 7PM

Zoom Webinar

*Link will be emailed to
registrants the week before*

Curious about how artificial intelligence can actually support your work as an educator — rather than complicate it? Join us for a dynamic, hands-on workshop that peels back the mystery of AI and reveals just how empowering these tools can be in real classrooms. We'll start with the big picture: why AI is emerging as an essential ally in education and what it means for you. From there, we'll get practical with "Prompting 101," a crash course in how to talk to AI in ways that make it genuinely helpful. Whether you're designing lessons, aligning to standards, or seeking new ways to spark student engagement, you'll see how teacher-facing tools like Microsoft Copilot and Khanmigo can save time, unlock creativity, and personalize instruction like never before.

But this isn't a sit-and-get. You'll have the chance to explore, experiment, and collaborate in our "Choose Your Own Adventure" session — where you can dive into a topic that speaks directly to your teaching goals. Whether you're curious about using AI to differentiate instruction or streamline your planning process, you'll walk away with practical strategies and a renewed sense of possibility. We'll end the day with space to reflect, ask questions, and share ideas, supported by a resource bank you can return to long after the session ends. This is more than a workshop — it's an invitation to imagine what's possible when educators lead the way into the future of learning.
