

for Teachers & Paras Members

WEBINAR

OCTOBER 15
WEDNESDAY
6-8PM

NotebookLM

NotebookLM turns your instructional material (docs, slides, websites, videos, podcasts, pasted text and PDFs) into a smart, cited briefing. We'll build a notebook from scratch, generate summaries and study guides, create personalized audio and video overviews and model safe, transparent AI use for PD and classrooms.

Gemini Storybook

Create custom, illustrated stories with read-aloud narration. Just describe what you want, and Gemini will create a unique 10-page storybook.

Google Classroom

30+ tools to help teachers manage learning more efficiently, plan, support and assess students, to potentially free teachers up to focus more on students, not the paperwork.
